

**HAVERLAND®**

PORTABLE CONVECTOR  
"SLIM LINE" with ECO function

# IDK-1

POWER  
FOR ROOMS UP TO (M<sup>2</sup>)

2.000 W  
25

The Haverland IDK-1 represents a new generation of innovative heating; the only device that combines PTC and carbon fiber, which offers better thermal performance.

Precise thermal sensors enable the IDK-1 to intelligently heat the room and maintain a constant temperature, using less energy in the process.

The IDK-1 sports a slim stylish design and is portable, with wheels and handles, so the unit can be easily moved around to wherever it's needed.

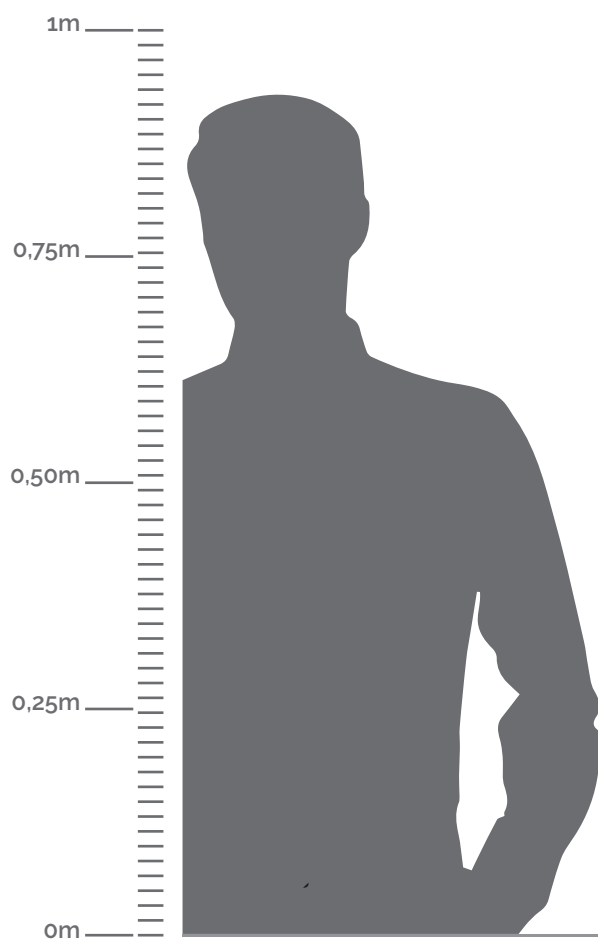

Safety features are built in - if the unit tips over or overheats, it shuts off automatically.

The IDK-1 is user friendly with four pre-programmed modes and a large LED screen. For added convenience, a remote control is included.
