Quality Matters

At Towelrads we are passionate about creating both beautiful and practical towel rails and designer radiators, that enhance any room within your home.

All our radiators are manufactured and tested to the European Standard EN 442.

This means that all heat outputs have been independently verified, ensuring that the radiator of your choice performs as expected.

There are many different diameters of tubes used across the industry but at Towelrads we use 25mm tubes on our standard towel rails to ensure maximum heat output.

Guarantee

Our guarantee is valid when the system is designed in accordance with the British Standard Code of Practice for Water Based Heating Systems in Buildings BS EN 12828:2012+A1:2014 and BS EN 12831: 2003. The installation and commissioning of the system should comply with BS EN 14336:2004. On completion of the installation the system should be properly flushed and filled in accordance with the British Code of Practice for the Treatment of Water in Domestic Hot Water Central Heating Systems BS 7593:2006, Part L of Building Regulations and Good Practice Guidance for Scotland. QRL strongly recommend the use of corrosion inhibitor for all applications. Failure to observe these standards may invalidate the manufacturer's warranty. **Radiators Within High Humidity Zones** – Surface Corrosion is likely, this is superficial only and requires annual maintenance / cleaning.

A bit of information about your towel radiator:

- All of our wet system radiators are tested according to the EN442 European regulatory standards; and our electric radiators are tested according to EN60335-2.
- Maximum operating temperature is generally at 110 ºC, however, certain models may have a slightly reduced temperature range.
- Chrome towel rails and Designer radiators are degreased, coated in a powder coating. Chrome towel rails are then polished and bathed in successive layers of chrome to achieve the high quality look and finish of each radiator.

Caring for your Chrome Towelrads product:

- Do not clean with abrasive chemicals as this may lead to corrosion and invalidate the warranty.
- Clean with warm water and a little neutral washing up solution, rinsing immediately with clean water and drying with a soft, clean cloth.
- The occasional use of a mild, non-abrasive lime scale remover can be used but MUST be rinsed away immediately with cold water (a diluted white vinegar solution is recommended).

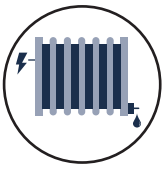

Our Radiators Explained

Central Heating Radiators and Towel Rails

Radiators run off the central boiler system using TRV valves to help you control the temperature.

Dual Fuel Towel Rails

This option allows the towel rail to be used within the summer months via an electric element when the central heating system is switched off. Benefits include year round warm towels within your bathroom or kitchen.

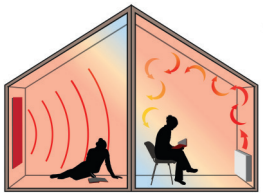

Electric Radiators and Towel Rails

These are supplied solution filled and with a single heating element fitted. The heating is controlled via the electric mains rather than through a central heating system. The benefits include the ability to control the heat within a chosen room rather than the whole house.

Infrared Radiators

Our glass radiators use infrared technology to produce comfortable, energy-efficient heat. Traditional convector heaters warm the air, but infrared heat is absorbed by surfaces, objects and people within a room so the heat is retained, keeping the room cosy and dry for longer.

Ecodesign Compliance

Since January 2018, all local space heaters manufactured for sale in the EU must comply with a minimum efficiency standard under Lot 20 of the Energy Efficiency Directive. It is part of the EU's commitment to achieving a 20 per cent energy saving by 2020, driving energy efficiency at all stages of the supply chain, from production to final consumption.

A number of 'product lots' have already been rolled out as part of the 2012 Energy Efficiency Directive (EED), covering everything from televisions to lightbulbs and washing machines. Next is Lot 20, focusing on local space heaters – and when you consider that more than half of energy consumed in our homes is used to heat water and space, it is easy to see the difference it could make.

Ecodesign Compliant

How to order your Towelrads Radiator

Step 1

Work out the heat output required for your room using the Heat Output Calculator on our website **www.towelrads.com** or consulting with your installer.

Step 2

Our radiator models have been carefully chosen to fit most standard radiator sizes, therefore negating the need for new pipework. Choose the style of towel rail or radiator that suits your requirements. If it is difficult to access the existing central heating pipework, we have a great selection of electric radiators too!

Step 3

Take a look at the finish and colour options available in your chosen model. Some of our radiators and towel rails are available in a range of top-selling RAL colours; many others are stocked and available for free next-day delivery.

Look out for the Special Finish symbol. 

Step 4

After you have selected your radiator, choose some of our stylish valves to finish the look. We have many styles and colours to complement your new radiator and pipework orientation. If you want warm, fluffy towels in the summer when the central heating is switched off, take a look at our Dual Fuel options.

Step 5

Order your radiator by calling **01628 625367** or emailing **orders@towelrads.com**

The majority of our radiators are available with free next-day delivery.

Colour Range

We believe in offering our customers a wide choice of styles and colours to complement their home décor. Many of our stocked radiators are available in contemporary colours with matching valves, ready for next day delivery.

Further colour options are available with minimum of 6 weeks' lead time of our 12 top-selling colours.

Our 12 Top-Selling RAL Colours

Rose Gold (painted)	Gold (painted)	Silver (painted)	Pure White	White Aluminum	Jet Black	Traffic White	Slate Grey	Basalt Grey	Light Grey	Graphite Grey	Grey Aluminium
			RAL 9010	RAL 9006	RAL 9005	RAL 9016	RAL 7015	RAL 7012	RAL 7035	RAL 7024	RAL 9007

This beautiful range of colours are available with the following radiators:

Mayfair p9

Soho p10

Horton p11

Kensington p16

Strand p17

Ballymore p18

Perlo p20

Boxford p22

Hampshire p24

Oxfordshire Vertical p45

Soho Vertical p47

Merlo Vertical p48

Dorney Vertical p50

Mayfair Vertical p52

Iridio Horizontal p71

Please allow 6 - 14 weeks for your delivery.

These finishes have a 25% price premium on stocked Anthracite or Black painted products, as appropriate.

Please be aware you have up to 14 days from the order date to cancel or amend your bespoke order. After 14 days we are unable to cancel or amend the order due to the product being in full production.

We are unable to accept any returns on bespoke orders as these are specially manufactured for each customer and cannot be resold.

GLASS AND STONE RADS

144248 **Vetro Mirror Soap**

Glass Radiators

Towelrads are proud to introduce Vetro, their new range of glass radiators.

Combining elegant frameless design with innovative technology, the Vetro radiator is a must have for any room in your home.

Our glass radiators produce energy-efficient heat through the use of Infrared technology, reaching set temperatures within 5 minutes.

Compared to convector heaters which warm the air, infrared heat is absorbed by surfaces, objects and people allowing the heat to be retained within the room as well as keeping dust and bacteria to a minimum.

Each radiator is made from shatterproof 10mm laminated toughened safety glass (UN12600-IBI) which provides complete peace of mind.

Each radiator comes complete with a fitting guide and hidden adjustable safety wall brackets* for discreet, fast and simple installation.

*manufactured to German Norm VEDE6035.

Electric Range

- Touch screen control includes illuminated pre-programmed settings for ease of use.
- Wireless remote control is included for easy 7 day timer programming.
- An antifreeze setting that protects the room from falling below 5 – 7 ºC, plus a useful drying function which switches the unit on at a pre-set time of 2 hours.
- Suitable for use within zone 2 makes them perfect for use within bathrooms and wet rooms.
- Infrared heat, which is absorbed by surfaces.

Wet System

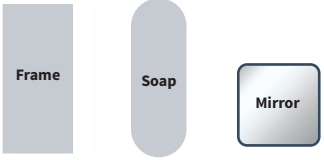

- Our patented glass radiators are 100% environmentally friendly and made entirely from recycled materials.
- Efficient and economical to run through the use of an Aluminium heat exchanger resulting in the ability to adapt quickly to changes in temperature and the reduction of time for heating and cooling.
- Corrosion resistant and tested to twice the average bar pressure used in a standard home.
- High heat output up to 90 ºC.
- Incorporates standard plumbing fittings for an easy installation into an existing or new central heating system.

Vetro Glass

Central Heating

Features and Benefits

- Low water content
- Aluminium heat exchanger
- Toughened glass
- 2 types / styles
- Fixes close to wall

LADDER TOWEL RADS

The Pisa Range

The Pisa range has 25mm diameter tubes which give a greater heat output than most standard 19mm and 22mm tubed towel rails on the market.

Available in both straight and curved designs, the Pisa radiators will complement any bathroom.

Features and Benefits

- High heat output achieved by using 25mm bars
- Versatile, can be used on central heating or dual fuel systems
- Wide range of sizes to cater for all spaces
- An even higher heat output can be achieved via painted or powder coated models
- Horizontal models fit neatly under windows

COMPLEMENTARY RANGE

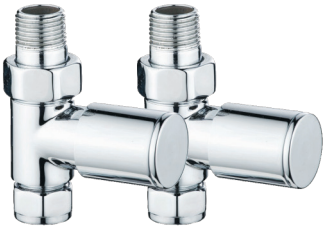

Understanding The Complementary Range

Valves Explained

Manual Radiator Valves

These work like a tap, you can turn the top of the valve to allow more or less water into your radiator.

Straight Radiator Valves

These join the radiator to the central heating pipework in a straight, vertical line. The pipe work comes from the floor.

Angled and Corner Radiator Valves

These allow you to join the central heating pipework to the radiator at an angle. The radiator valve has a 90° bend in it so that the valve inlet can be met in either a horizontal or vertical position. The pipe work comes from the wall.

The benefit of using Corner valves when pipe work is coming from the wall is that the radiator head will be pointing upwards and will not increase the overall depth of your radiator.

Thermostatic Radiator Valves (TRVs)

Unlike manual valves, TRVs self-regulate, taking into account the room temperature to ensure that the radiator works at an optimum temperature.

Dual Fuel Valves

Traditional Standard Set-up

- Off set pipes
- Purchase separate T-piece
- Asymmetrical look
- Towel rail can be used in the summer when the central heating is switched off

Round manual valve with element port (129015) **with Smart Thermo controller** (126008) **300W**

Manual Valves

- Can be used in the summer when the central heating is switched off
- Pipes do not need to be off set
- Clean, neat look
- No need to use a T piece
- See page 90 for elements and page 92 onwards for valves

Angled Dual Fuel TRV and Lockshield (129037) with Smart Thermo controller (126008) 300W

Thermostatic Set-up

- Can be used in the summer when the central heating is switched off
- Pipes do not need to be off set
- Clean, neat look
- Thermostatic TRV valves control temperature when central heating in use
- No need to use a T piece

Smart Elements

Smart Thermostatic

Functionality

The heater offers five temperature settings from 30 ºC to 65 ºC. An electronic temperature sensor ensures precise temperature control.

The device displays the temperature to which it is currently set, and indicates the status of the heating cycle.

Comes with 2 hour boost, 12/24 hour recurring timer.

Safety

The heater has an active safety feature which initiates in the event of dry radiator operation. The heating element is equipped with a temperature sensor and thermal fuse (double overheating protection) and offers frost protection (ANTIFREEZE). The heater will display warning indicators in the case of malfunction.

Smart Non-Thermostatic

Functionality

The heating element maintains a constant temperature of 65 ºC. It has a small, simple controller and IPX5 Ingress Protection.

Intelligent Home Systems

Device is suitable for connection to external timers or intelligent home systems.

Safety

The heating element is equipped with double overheating protection.

Design

LED sensor encased in a small, round casing.

Smart Timed Thermostat

Including Remote

- 5 step temperature regulator within 30 - 60 ºC
- Drying function – heating power and time programming 1 - 4 hours
- IPx5 protection class
- Antifreeze function protects against radiator temperatures falling below 5 - 7 ºC
- Capability to cooperate with external timer or with intelligent home systems
- Supplied with remote control as shown
- Open window sensor function

Smart 43D

- Maintains a consistent temperature of 43 ºC
- 2 hour drying and anti-freeze function protects against radiator temperatures falling below 5 - 7 ºC
- Double overheating protection

Bluetooth Smart

- Advanced electronic chronothermostat
- Controlled via an app on both iOS and Android devices
- 6 pre-set programs and 3 user programs
- Operational modes: comfort, night, Fil-Pilote, timer 2 hours or boost 2 hours, stand-by, clock thermostat, antifreeze, Eco, ASC, continuous heating and key lock
- Classes I and II
- IP44 protection
- Open Window Detector reduces energy consumption
- Chrome only
